

LOOKING FOR WAYS TO MAKE YOUR STAFF MORE ENERGY-AWARE?

IN ORDER TO HELP MEET PUBLIC SECTOR ENERGY TARGETS IN YOUR ORGANISATION

Codema's dedicated energy awareness team can introduce its award-winning Think Energy campaign into your workplace, with a range of innovative activities and promotional material which will inspire your staff to save energy. Our energy-awareness services are ideal for a staff energy day or as part of a long-term, tailor-made campaign.

01 HOME ENERGY SAVING KIT

We can provide staff demonstrations of the **Home Energy Saving Kit**, which contains 6 key tools to help you make sense of the energy you consume every day. These tools address key areas of energy use in the home - space heating, hot water and electricity consumption - and can help identify common problems such as lack of insulation, poor ventilation and the appliances in the home that might be driving up electricity bills.

02 GUIDE TO HOME ENERGY SAVINGS

We can provide engaging promotional material such as the **Guide to Home Energy Savings**, which includes a range of practical tips to save energy across all areas of the home.

03 INTERACTIVE LIGHTING DISPLAY

The **Interactive Lighting Display** highlights the common bulb types on the market and explains the difference between the cost, energy efficiency and lifespan of these bulbs. This is coupled with a **Guide to Energy Saving Light Bulbs** which helps you make an informed decision in order to buy the right bulbs for your home.

04 PROMOTIONAL MATERIALS

We can also deliver customised posters, promotional materials, staff surveys, online quizzes, great competitions and much more to suit your organisations' needs.
