# BORROW A HOME ENERGY SAVING KIT FROM YOUR LOCAL LIBRARY TODAY

Find out how you can save money by better understanding your home energy use!

The **HOME ENERGY SAVING KIT** contains five useful tools, which help you better understand where you are currently wasting energy at home. It comes with a complete User Manual which makes it easy to use. The **HOME ENERGY SAVING KIT** demonstrates how you can save energy and money while making your home more comfortable—it is the first step towards a more energy-efficient home!

You can now borrow the Home Energy Saving Kit free of charge from a selection of public libraries across Ireland.

For more information on the kits, including demonstration videos and whether they are available from your local library branch, visit:

# WHAT'S IN THE HOME ENERGY SAVING KIT?

- ① **FRIDGE/FREEZER THERMOMETER**  
Adjust the temperature in your fridge and freezer to save energy.

- ② **TEMPERATURE & HUMIDITY METER**  
Identify the temperature and humidity levels in every room of your home.

- ③ **RADIATOR KEY**  
Bleed your radiators to make them run more efficiently.

- ④ **THERMAL LEAK DETECTOR**  
Measure the temperature of your walls, floors, windows and ceilings to identify air leaks and draughts or insufficient insulation and glazing.

- ⑤ **PLUG-IN ENERGY MONITOR**  
Understand how much energy the appliances in your home use and calculate their running cost.
